

SHUBH RAKESH NAHAR

Artificial Intelligence Engineer | LLM & RAG Systems | Graph RAG | Agentic AI

New York City Metropolitan Area | Shubhrakeshnahar@gmail.com | +1 (334) 434-6529 | linkedin.com/in/shubhnahar

TECHNICAL SKILLS

AI & LLM Systems

LLM/RAG Systems, Graph RAG, Agentic AI, NLP, Azure AI, Cohere API, Sentiment Analysis

Platforms

Nuuron Building Plug-in API, Copilot Studio, Power Automate, Dataverse, Dynamics 365, Neo4j, Microsoft Teams, SharePoint

Programming & APIs

Python, Flask, RESTful API Design, JavaScript, C++, SQL, HTML5

Machine Learning

TensorFlow, PyTorch, Keras, LSTM, scikit-learn, ARIMA, Pandas, NumPy

Data & Security

OCR Data Extraction, Token-Based Authentication, GUID Masking, Access Controls, Secure API Design

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (AI-102)
- Next-Gen Productivity: Copilot + Agents for the Modern Enterprise
- Deploy and Adopt Microsoft 365 Copilot + Agents: Proficient
- Technical Exposure: DP-900 (AI Fundamentals)
- DW-101 & DW-102 (Data Warehousing Concepts)

EDUCATION

Master's in Computer Science, Artificial Intelligence

Troy University, USA
Jul 2025 | CGPA: 3.0 / 4.0

Bachelor of Science in Information Technology

KC College, Mumbai University, India
Jun 2022 | CGPA: 8.14 / 10.00

HONORS & AWARDS

- India's Youngest Entrepreneur, awarded by MIDDAY Newspapers for tech initiative and early startup execution.

PROFESSIONAL SUMMARY

Artificial Intelligence Engineer at Coforge building production LLM and retrieval-augmented generation (RAG) systems, including Graph RAG with Neo4j and agentic AI workflows. Currently focused on the Nuuron Building Plug-in API. Former AI Consultant at proMX (internship), contributing to Copilot Studio and Power Platform agents. Microsoft Certified Azure AI Engineer Associate (AI-102), with a Master's in Computer Science (Artificial Intelligence) from Troy University, July 2025.

EXPERIENCE

Artificial Intelligence Engineer

Coforge | Princeton, NJ (On-site)

Sep 2026 - Present

- Current focus:** Lead development of the Nuuron Building Plug-in API, connecting building systems to AI workflows and enterprise applications.
- Build production LLM/RAG systems; develop Graph RAG solutions with Neo4j linking structured knowledge to LLM reasoning.
- Design agentic AI workflows that orchestrate tools, data sources, and multi-step reasoning.

AI Consultant (Internship)

proMX | Dallas, TX

Nov 2025 - May 2026

- Contributed to a production Travel Assistant agent: Dataverse data models, Power Automate parent/child flows, and Teams, Outlook, and SharePoint integrations with OCR extraction and allowance-rule checks.
- Contributed to a Smart Project Operations PO Agent in Copilot Studio, using a router architecture to classify user intent and route requests to backend workflows.
- Supported a multi-timezone meeting scheduling agent for Outlook and Teams calendars, including conflict detection and timezone conversion.
- Applied technical GUID masking and token-based secure ID retrieval to protect sensitive data under enterprise governance controls.

Backend Developer

Jetvi Enterprises | Mumbai, India

Jan 2022 - Jun 2023

- Optimized application architecture and engineered core AI features for the Doubleau app, improving scalability, processing speed, and user engagement.

Business Development

Jetvi Enterprises | Mumbai, India

Jan 2022 - Jun 2023

- Developed a third-party RESTful API strategy that expanded the available feature set and widened business market reach.

PROJECTS

Anime Educational Chatbot (EduBot)

Interactive Flask web application using Cohere NLP, secure token-based authentication, OCR content extraction, and text-to-speech utilities.

Stock Market Sentiment Analyzer

Predictive web application combining LSTM and ARIMA models with real-time social sentiment extraction for live price forecasting.
